- A massive \$700 discount off the list price on your new WTW 2020 controller that links up to 20 sensors

What's in it for you!

- Your new 282/284/2020 controller has a USB interface with integrated datalogger
- Enables hassle-free update on software for controllers and sensors anytime for free and without any technician
- High protection IP 67
- Your new WTW 2020 controller has an intuitive software and a large graphic display for full overview of all parameters
- All your new controllers offer compatibility with your existing WTW IQ SensorNet sensors.
- Enables you to remotely monitor your system if required at no ongoing software license fee depending on the model you choose.
- Opportunity to make multiple transmitters redundant by using a single WTW 2020 controller

OFFER #2

Replace any brand of Dissolved Oxygen Sensor and Transmitter at Throwaway prices using [WTW's calibration free DO sensor and transmitter](#)

- Replace your current DO sensor (any brand) or get a new one using WTW DO sensor at a great \$500 discount.
- We will throw in a \$500 discount on the WTW 282 transmitter as well with the DO sensor.

What's in it for you!

- Get away from routine calibration of your existing DO sensor as the WTW Optical DO sensor is calibration free
- Save on your time and chemicals and forget about maintaining an inventory of chemicals and reagents
- High measuring certainty and accuracy due to the smart 45 deg sensor cap keeping air bubbles away
- Fine resolution of 0.01 mg/L (concentration) or 0.1% (saturation)
