

Xylem Custom Systems + Solutions

Years of experience with trusted brands - solving your water challenges

xylem
Let's Solve Water

Source Water

- Reservoir management
- River Monitoring
- Inlet Protection
- Water Scarcity
- Meteorological Data
- Water Quality Monitoring System
- Bathymetric Survey

Marine Transport

- Ports and harbours
- Aids to navigation
- Maritime security
- Meteorological system
- Hydrological system
- Marine environmental monitoring

Mining

- Environmental monitoring
- Surveying and mapping
- Flow meter
- Meteorological instrument
- Compliance monitoring
- Water balance monitoring

xylem
Let's Solve Water

Xylem Analytics

Creating innovative solutions to meet our world's water needs. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work.

Oil & Gas

- Environmental Monitoring
- Bathymetric survey
- Wave and current monitoring
- Buoy deployment

Wastewater Monitoring

- Water quality and flow monitoring
- Continuous monitoring and control
- Wastewater sampling

Service and Calibration

- In-country support for Xylem Analytics' products
- Factory accredited servicing and calibrations
- Field-service capability for WTW online products – install, commission, handover.
- On-site calibration and fault-finding

Dredging

- Early warning systems
- Compliance monitoring
- Site surveys
- Meteorological system
- Hydrological systems

Off Shore Monitoring

- Wave measurement
- Current Measurement
- Water quality profile
- Spill tracking
- Tide measurement

Aquaculture / Mariculture

- Continuous monitoring & control systems
- Tank based solutions
- Level and flow monitoring
- Environmental monitoring systems
- Cage & pen, current & water quality systems

Xylem Analytics is a manufacturer of Water Quality instrumentation used in Deep Oceans, Surface and Coastal Environments and through to Laboratory instrumentation.

Xylem Analytics provides a niche service in directly supporting our manufactured products, having established a dedicated Service Centre in each of our strategic locations around the world in which all instrumentation manufactured under the Xylem Analytics' banner is fully supported and serviced. Xylem Analytics also integrates where necessary, products from external suppliers in order to provide the desired solution for our client base.

Xylem Analytics' environmental instrumentation solutions for water level monitoring and water quality analysis are specifically designed for unattended remote operation for extended periods. These instruments are used in a variety of environmental applications such as surface and groundwater monitoring, nutrient analysis, wastewater treatment plants and final discharge monitoring. Our sensors are manufactured and designed for the conditions encountered across the globe.

Ocean & Coastal Research

- Ferry box
- Weather monitoring
- String system
- Data buoy

Groundwater Monitoring

- Level and water quality systems
- Compliance monitoring
- Artesian monitoring

Catchment Monitoring

- Non-point source monitoring
- Diffuse pollution
- Flood warning system
- Irrigation monitoring

What can Xylem do for you?

We're a global team unified in a common purpose: creating innovative solutions to meet our world's water needs. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. We move, treat, analyze, and return water to the environment, and we help people use water efficiently, their homes, buildings, factories and farms. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise, backed by a legacy of innovation.
